Kyle of South Dakota, Prof. John Fiske, the historian, and Albert L. Johnson, a street railway promoter. Foreign Affairs. A sharp debate occurred in the house of

commons on the government's war policy, the government leaders stating that the Boer generals, after consulting with Paul Kruger, had decided to continue the strug-gle; evidences of further splits in the opposition were disclosed; Boers wrecked a train near Naboomspruit, killing eighteen. Earl Russell's trial before the house of lords for bigamy committed in the United States was postponed to August 6. It was announced that a bill would be introduced in parliament changing the title of the king to that of emperor, to recognize the sovereignty over the colonies. Germany secured from Spain an option on the Island of Fernando Po. A director of the collapsed Leipziger Bank, Karl F. Schaeffer, killed

himself. Socialists created a disturbance in the Belgian legislature parliament; the Belgian labor party issued a manifesto threat-ening a revolution. The Chinese empress dowager declined to return to Pekin. A state of siege was proclaimed at Buenos Ayres, Argentina, because of political In the District. The general observance of police regulations as to the size and character of fire-

works resulted in a comparatively quiet and safe celebration of Independence day. The day was observed with appropriate ceremonies by the Oldest Inhabitants' Association and the Sons of the American Revolution. W. V. R. Berry entered suit against the District for revoking a building permit for the erection of an apartment house opposite Farragut square. Walter F. Horse Held Fast by Mud Until High Tide Drowned Him.

Members of the crew of the police boat earned their month's salary yesterday when they put in five hours near the Aqueduct bridge recovering the dead body of a horse from the river. Two days ago the animal walked into the water from the Virginia shore at low tide and the mud was so deep that the animal was soon unable to move. The poor beast evidently struggled to get out of the mud, but did not succeed, and at high tide was com-pletely covered with water. The hot sun of two days had caused an unpleasant odor. The police reported the nuisance in the regular way, and yesterday Harbor Master Sutton went out with instructions to abate it. The animal was so securely imprisoned in the mud that a tug had to be employed to move the body. After being towed as far as Littlefield & Alvord's wharf the car-cass was hoisted by means of a derrick and placed on a scow, to be taken down the

A BRAIN FOOD AND REPAIRER. modern conditions to the active and sometime

creta thrown out by the pores shows that brain work breaks down the phosphate of potash, separating it from its heavier companion, albumen, and plain common sense teaches that this elemental principle must be introduced into the body anew each day, if we would replace the loss and rebuild the brain tissue.

We know that the phosphate of potash, as pre-sented in certain field grains, has an affinity for albumen, and that is the only way gray matter in the brain can be built. It will not answer to take the crude phosphate of potash of the drug shop, for nature rejects it. The elemental mineral must be presented through food directly from nature's laboratory.
